New Left Review (Concrete Historical Structure)

By Perry Anderson

Part I – The Originals

I. Historical Structure Concretely

In fact the index of effectivities then determine Europe as in fact an EU structure which then is legal and economic which then has the Spanish structure which is with advanced mixed economics and then the Greek and French structure which is more advanced and more Mediterranean.

II. American Finance and World Bank, IMF articulated to the Indian

Pattern of Development and Aiding EU

In fact then the structure becomes the current Euro-American structure which is how even India is a developing country which is aided by World Bank loans and is servicing its debt by a fiscal deficit which then is well organized.

Part II – Graeco-Roman empire

I. Historical Structure then

Just an index of slave mode of production and in fact institutions of leisure and formal lifestyles in urban centers with merchantile life and capital which orders the Aegean as trade and even domestic trade routes.

II. Importance of History

In fact then the Philosophy of History in Sartre is very important it just means many and myriad configurations of labouring worlds and politics of the poorest which become part of the world of capitalism and is then the world market – which means in fact an organization of the abstract law of value.

Jameson argues a simple view of the world is the abstract law of value which then criss-crosses the world in surplus-value.
